BOYS & GIRLS CLUBS OF SOUTHERN UTAH

November Club & Activity Details

Message to Parents:

Happy November families! Below is a description of each of the clubs. While the theme and activities of each club vary, they are all aimed at helping students develop social and emotional skills, exploring creativity, and trying new things. Back by popular demand, our DND club is returning!

Basketball Club

This club will focus on skill building, teamwork, and character on and off the court. Whether you're a beginner or looking to sharpen your skills through practice, our basketball club will provide a positive, energetic environment to help every player.

Cooking Club

This club will teach basic cooking techniques and skills, such as measuring, food preparation, and serving. The goal is to expand students' knowledge of ingredients, recipes, and culinary traditions. This club is designed to boost students' confidence in their ability to cook and create meals, in addition to gaining an understanding that we can all practice healthy eating on a budget!

DnD Club

Creating a character, crafting a world, and developing friendships are the building blocks of DnD club. Students will utilize their literary skills to write backstories and profiles for their characters. They will problem solve with their peers while learning how to solve issues while placed in an out-of-this-world environment.

Threads Club

We will be doing all sorts of projects to develop skills in all things yarn, thread, and fiber materials. We will also make art out of recycled materials, and students will learn how to transform everyday materials such as plastic bags and what might normally be deemed as "trash" into creative art projects. We will be making an assortment of take-home projects from rugs to Christmas ornaments.

Slimy Sensory Club

This club will focus on creating things to help ourselves when we feel stressed, frustrated, and overwhelmed. Students will create a coping box of sensory creations to engage all five senses– sight, sound, taste, smell, and touch. Projects will include fidgets, slime, worry pets, bubbles, and more.

Mad Scientist Club

An engaging and exciting STEM club filled with hands-on projects, fun experiments, and creative challenges. Students will get to build and launch rockets, craft slime, design and test a bridge, discover the awesome power of chemistry, and more! Our club provides a safe and supportive environment for kids to ask questions, work with new friends, and develop the real-world skills of critical thinking and problem-solving.

Minecraft Engineering Club

This space is carved out for teamwork exercises within the educational version of minecraft. Students will world-build together, helping each other to finish a variety of adventure based objectives.They will re-create real life, famous architecture within the game, build working relays and circuits, and try out city planning. Finally, the teams will all come together to fight the final Ender Dragon boss after creating a world they are proud of.
