Activity Descriptions:

Homework Help: This is time for students to get help from our staff on any homework questions they may have. If students don't have homework or finish early, we have high yield learning activities they can participate in.

STEM Labs:

- 4/15- We will be virtually exploring Hawai'i's volcanoes. We'll discuss the cultural beliefs behind the volcanoes as well as the science behind the volcanoes.
- 4/17- The kids will learn what haikus are and how they came to be. We will then have the kids write haikus on their own as well as in groups. They will be given random themes at some point as well as be able to write their haikus on whatever appropriate topics they come up with.

Sign Language: Students will learn the alphabet in sign language forwards and backwards.

Storytelling:

- Part 1 (4/14)- Students will learn the basics of a story (protagonist, setting, etc.) and then will pick characters to make their own story/comic book.
- Part 2 (4/16)- A surprise element will be added that students need to incorporate into their stories. Students will finish writing and illustrating their story/comic book. We will then share a few with the group so we can see what everyone created.

Disney: Students will watch a Disney Short film and then create their own through making a flip book.

Fun Friday Group Activity: Yoga and Cardio!
