## Activity Descriptions:

**Kickoff Party:** A kicking off party to get caught up on how everyone has been and how the new online program will look!

**Homework Help:** This is time for students to get help from our staff on any homework questions they may have. If students don't have homework or finish early, we have high yield learning activities they can participate in.

### STEM Labs:

- 4/15- Club members will learn about simple machines and their application in our daily lives. They'll get the opportunity to find simple machines around the house.
- 4/17- This activity will focus on teaching the kids different types of clouds and how they form. They'll get the chance to go outside to identify them and even make their own cloud in a jar if they'd like to follow along with the staff!

**World History:** 4/13- Kids will be talking about specific countries and some of the historical events behind them.

**Language:** 4/15- Live virtual Tour of different countries and talk about their language and unique culture. The kids will be able to practice different useful phrases that are used in everyday conversations.

### Yoga:

- Part 1 (4/14)- Staff will teach the kids about different yoga poses and they will be able to try them out from home. It'll help teach kids mindfulness, self-awareness, and breathing skills.
- Part 2 (4/16)- This activity will teach the kids some basic yoga poses and about meditation. Everyone will need a space, so they can do yoga along with Taleea!

**Fun Friday Group Activity:** Pet Parade! Children will have the opportunity to showcase their pet(s) and any special talents they might have. If they don't have a pet, no worries! They can show off a plant or draw their ideal pet. Everyone will get a chance to share their friend!
