Social Emotional Learning (Prevention & Behavior)

Monday-Friday 8:30am, 1:00pm

The Positive Action curriculum is an evidence based program that is integrated in afterschool activities to build a positive environment throughout the program -- an environment that encourages students to do their best and be their best. Positive Action teaches real-life concepts that help students feel good about themselves.

Academic Support

Monday-Friday 11am

We have time set aside each day for children to reach or participate in HYLAs so they can better retain their school year knowledge.

Field Trips

TBD

Enrichment

Monday-Friday 9-11, 2:30-5:15pm

We will continue running clubs this summer that will focus on a variety of kids interests and building skills they can take forward in life. We also will have daily theme-based rotations.

June Club & Activity Details

Message to Parents:

Hello Everyone! We are so excited to provide another summer program for you all this year. Summer is by far one of our favorite times of year because we can offer so many different activities and clubs throughout those months when they aren't attending school. We have many big ideas for this summer and can't wait till we can make them come to life!

SEL -- The Positive Action curriculum is an evidence based program that is integrated in afterschool activities to build a positive environment throughout the program -- an environment that encourages students to do their best and be their best. Positive Action teaches real-life concepts that help students feel good about themselves. This program is run daily with new topics each week.

Meditation with an SEL focus - In partnership with our SEL curriculum, we will be continuing our daily meditations at Cherry Hill this year. During this time, children will be able to take a break and relax after lunch. There will be a focus on brain breaks, relaxation, and self-care while also implementing the weekly SEL topic.

STEM -- Children will get hands-on experience with the scientific method and engineering process. Our Americorp specialists will be planning a variety of STEM labs each day that will allow students to build a variety of skills and knowledge.

Reading/HYLA -The main focus of reading/HYLA time will be to help youth retain school year knowledge, work on HYLA's (High Yield Learning Activities) that promote growth and learning opportunities and also participate in a reading program throughout the summer. Our goal is to help youth reduce the loss of knowledge over summer and completing daily activities at programs to make the learning more enjoyable.

Clubs - We will continue running clubs this summer that will focus on a variety of kids interests and building skills they can take forward in life.
