July Club & Activity Details

Message to Parents: We are so excited for our summer program this year! We hope to help your kids reach new heights, as we teach them new knowledge and skills during these activities. Our activities have been designed to provide a safe, fun summer experience that will help your kids to grow as members of the community.

Social Emotional Learning:

Positive Action- Social Emotional Learning curriculum is an evidence based program that is integrated in afterschool activities to build a positive environment throughout the program -- an environment that encourages students to do their best and be their best. Positive Action teaches real-life concepts that help students feel good about themselves.

KidGrit- The kid-grit collective is passionate about equipping educators and students with the tools needed for success. The Kid Grit curriculum is innovative, while the mindful approach builds confidence & character, resilience & social-emotional learning, self-care & wellness.

Academic Support:

HYLA- or high-yield learning activities include leisure reading, writing activities and games like chess or Scrabble® that develop young people's cognitive skills. A high-yield learning activity is one in which youth use skills, information, behavior and values needed for academic success.

STEM- stands for Science, Technology, Engineering, and Mathematics. STEM based activities promote critical thinking, curiosity, decision making, and leadership skills.

Field Trips & Guest Speakers:

Drum Bus- Drumming improves confidence, coordination, creativity, focus and listening skills. It builds community, enhances collaboration and reduces stress. Students will be able to demonstrate basic rhythmic skills, hand eye coordination, and working together as a team.

Provo Fire Department- Members will be able to list ways to prevent fire accidents. Students will be able to explain what a smoke detector is and what it does. Students will provide the five steps necessary for an escape plan. Members will demonstrate the 'Stop-Drop-Roll' technique for extinguishing fire.

Scales N Tails- Students will be educated on a variety of reptiles and "creepy crawlies" to understand that they are just misunderstood creatures that play an important role in a variety of ecosystems. Students will be able to identify multiple reptiles by their correct names. Students will have the opportunity to handle and meet the animals up close.

Royden Derrick Planetarium at BYU- Students will learn facts and concepts about the night sky and the universe. This will motivate them to seek a deeper appreciation of astronomy. Students will be able to identify, classify and compare the objects in the Universe, including, but not limited to; atoms, nebulae, stars, stellar clusters, galaxies, clusters of galaxies, and constellations.

Enrichment Clubs:

Kinder - TBD

1st- TBD

2nd- TBD

3rd- TBD
