September Club & Activity Details

Message to Parents:

Hello Parents! Welcome to September! We have loved getting to know your students the last two weeks and first bit of program! We appreciate your patience as we get to know them and you! Please help your members remember to keep their hands to themselves and be active listeners while at club. This allows us to do lots of fun activities. This month, we will be learning more about our genetic makeup in STEM, how more of our actions impact our lives and those around us, all while still getting to create and move in clubs. Thank you for being here with us.

Project Learn - Project Learn or “Power Hour” is our academic time Monday - Thursday to help support what our club members are learning during the school day. Boys & Girls Club offers homework help, High Yield Learning activities, and other fun games/activities that have an academic focus that are still fun!

STEM - STEM is our twice a week rotation that is taught by our AmeriCorps member! STEM includes topics of science, technology, engineering, and math. Within this club our members will be able to learn and explore aspects of how the world works around them. Building, creating, and constructing projects out of objects in the world around them.

Social Emotional Learning- Similar to previous years, Boys & Girls Club uses two social emotional learning curriculums– SMART Moves and Positive Action. Within both curriculums, club members will learn a lot about feelings, emotions, being a good friend/peer, and ways to help others. Social Emotional is crucial to development and we make learning fun through these curriculums!

Get Moving Club - This month, club members will have the opportunity to learn about various sports and games within Get Moving club. Members will practice gross motor skills, teamwork, and sportsmanship. Get Moving club is separated by grade group to make sure that all members are safe, as different ages have different understandings, abilities, and motives.

Creative Club - In this club, members will be able to express themselves through various art mediums and crafting supplies. Members will learn new techniques and use materials that invite creativity and learning.
