

April 2025

Minersville

450 S. 200 W. Minersville, Utah | 801-372-4094

The mission of the Boys & Girls Clubs of Utah County is to inspire and enable all young people, to realize their full potential as productive and responsible citizens and leaders.

Our Social Emotional Focus this Month is creating Positive Relationships

Get to Know

Favorite Part of Spring

Kadences Favorite things about Spring is the flowers 🌸 and mountains 🏔️

Marquesas Favorite thing about Spring is the Better weather ☀️

Project Learn

(Monday-Thursday 4:15 - 4:45)

During this designated time, we focus on discussing school-related subjects, completing homework, or engaging in reading activities. Even if the children don't have assignments, we use this time to enhance their reading abilities by reading to a peer or a staff member.

STEM Labs

STEM stands for Science, Technology, Engineering, and Mathematics. It's an interdisciplinary approach to learning that encourages hands-on exploration, problem-solving, and real-world applications. STEM education focuses on integrating these four disciplines in order to promote critical thinking, innovation, and collaboration. By engaging in STEM activities, individuals develop skills that are essential for success

Enrichment

Enrichment clubs are to further enrich and broaden our members' experience by offering a variety of clubs. Clubs are to help students build skills in a variety of creative and fun activities.

Social Emotional Learning

(Prevention & Behavior)

Monday - Thursday

The Social Emotional Learning curriculum is an evidence-based program that is integrated into afterschool activities to create a positive environment throughout the program. This environment encourages students to do their best and be their best. The Leader In Me program teaches real-life concepts that help students feel good about themselves. SMART Moves, Kid-Grit if applicable)]

April Club & Activity Details

Message to Parents

Dear Parents,

I am thrilled to share my excitement about the upcoming spring activities we have planned for your amazing children! This month is going to be filled with fun and engaging experiences that I hope your little bunnies are just as eager to participate in as I am. We have organized a variety of vibrant clubs that will cater to different interests, from arts and crafts to nature explorations. For example, in our art club, the kids will have the opportunity to unleash their creativity by working on projects using a range of materials and techniques. Meanwhile, our science club will encourage curious minds to conduct hands-on experiments and discover the wonders of the natural world. With so many exciting adventures ahead, I can't wait to see the joy on their faces as they learn and grow through these enriching experiences. Let's make this spring unforgettable together!

Sincerely,

Kadence Anderson

CLUBS

Forces of Nature Club🌿: The Forces of Nature Club is dedicated to exploring accessible techniques for nurturing plants, caring for animals, and fostering a deeper connection with our natural surroundings. Members learn practical gardening methods that make it easy to cultivate a variety of plants, from vibrant flowers to fresh vegetables. Additionally, we focus on understanding animal behavior and proper care practices to ensure the well-being of our furry and feathered friends. Through hands-on activities and engaging discussions, participants also discover ways to tap into their own innate instincts and harmonize with the rhythms of nature, ultimately promoting a lifestyle that celebrates environmental stewardship and sustainability.

Synergy Squad🧪: The Synergy Squad Club is an exciting and engaging community for kids, where they have the opportunity to participate in a variety of fun science experiments led by the amazing Marquessa. Each session is designed to spark curiosity and creativity, allowing children to explore scientific concepts in an interactive way. Parents will appreciate that many of these activities can easily be recreated at home with everyday materials, making it a wonderful bonding experience. The experiments range from vibrant chemical reactions to hands-on physics projects, all aimed at inspiring a love for science. Plus, these engaging activities are budget-friendly, ensuring that learning and fun go hand in hand without breaking the bank. Join the Synergy Squad Club for an unforgettable adventure in science!

Color The World W/Kindness Club: In our Color The World with Kindness Club, children will engage in a variety of exciting games and interactive activities designed to foster teamwork and create a joyful, supportive environment. Through activities such as cooperative art projects, team-building exercises, and kindness-themed challenges, the kids will explore the importance of self-compassion and the impact of kindness towards others. Each session will provide opportunities for them to express themselves creatively while learning valuable lessons about empathy, respect, and the power of positive actions. Together, we'll cultivate an atmosphere where kindness thrives and friendships blossom.

Kickball⚽: The kickball club offers a fantastic opportunity for children to develop essential life skills, including good sportsmanship and social-emotional learning. Through engaging in this fun and dynamic sport, kids not only enhance their physical abilities but also cultivate teamwork, communication, and resilience—skills that will serve them well in various aspects of life as they grow. I am truly looking forward to playing kickball during the warm, sunny weather—it's the perfect setting to enjoy the game, connect with friends, and make lasting memories under the blue sky. The excitement of running the bases and hearing the laughter of teammates adds to the joy of being active outdoors.
