May Club & Activity Details

Message to Parents:

Hello Everyone! We are so excited for the final month of the school year. We have an amazing Parents Night planned and hope all can attend. Also we will continue to have our Fun Fridays.

Project Learn- Project Learn or "Power Hour" is our academic time, Monday-Thursday to help support what our club members are learning during the school day. Boys and Girls Club offers homework help, High Yield learning activities, and other fun games/activities that have an academic focus that are still fun! This month we will focus on Math and literacy skills through games, activities and buddy reading.

STEM- is our twice a week rotation that is taught by our Americorp members. STEM includes topics of Science, Technology, Engineering and Math. Within this club our members will be able to learn and explore aspects of how the world works around them. Building, creating, and constructing projects out of objects around the world around them.

Social Emotional Learning-Social Emotional Learning is crucial to development and helping to build lifelong regulation skills. We make learning fun through these curriculums. The curriculum that we use is an evidence based program called Positive Action. Through this curriculum and its many lessons, club members will learn how to take care of their body and minds.

Get Moving Club- Club members have the opportunity to learn about various sports and games. Members will practice gross motor skills, teamwork and sportsmanship. Some of our most popular sports members enjoy playing basketball, soccer and pickleball. The Get Moving club is separated by grade group to make sure that all members are safe, as different ages have different understandings, abilities and motives.

Enrichment Clubs

Drawing Club- Provides an opportunity to learn and practice basic drawing techniques and develop creativity.

Craft Club- Create fun art and craft projects using various materials like paper, glue, watercolors, oil pastels etc...
