February 16th - Presidents Day

Get To Know

Miss Maddie

My name is Maddie Cardon, and I am excited to be working with the students and families at Mt. Mahogany. I have a background in education and childcare and am happy to be back in a school setting supporting students' learning and growth. Outside of school, I love crafting and watching movies, and I'm originally from Washington but am really enjoying living here in Utah.

PARENT RESOURCES

[Parent Handbook](#)
[Membership Handbook](#)

Project Learn/Power Hour

Tuesday and Friday

Students will get the opportunity to complete homework or engage in a variety of learning activities in literacy or math (HYLAs).

STEM Labs

Wednesday and Thursday

STEM Clubs this month are brought to us by Thanksgiving Point! In Technology Club where students get to explore a new technology topic or career each session. In Science Club we get to explore different science topics every week!

Enrichment

Monday and Tuesday

This month we will continue sculpture club where students will continue sculpting with clay, or choose from a variety of other mediums. We will also be introducing pokemon club! In pokemon club students get the opportunity to explore all things pokemon, and even get to create their own!

Social Emotional Learning (Prevention & Behavior)

Daily

We will be continuing to work on Positive Actions and kindness. Students will discuss ways we can positively affect ourselves and those around us.

February Club & Activity Details

SEL- The Positive Action curriculum is an evidence based program that is integrated in afterschool activities to build a positive environment throughout the program -- an environment that encourages students to do their best and be their best. Positive Action teaches real-life concepts that help students feel good about themselves.

Power Hour - The primary focus of Power Hour is to support our youth in completing their homework, engaging in High Yield Learning Activities (HYLAs), and participating in our reading and math programs. Our goal is to reduce missing assignments by collaborating with school-day teachers and ensuring that students complete their daily tasks during our program, allowing for more quality family time at home. For students without homework, we offer a variety of HYLAs, along with our reading and math programs, to further enhance their overall knowledge and skills in these important subjects.

Technology Club - Technology Club is put on by our wonderful partners at Thanksgiving point, and is designed to provide students with exposure to a broad range of technology and related career pathways. Each week, students engage with a different area of technology, allowing them to develop a foundational understanding of how these technologies function and how they are applied in real-world settings.

Science Club - Science Club is put on by our wonderful partners at Thanksgiving point, and is designed to introduce students to a wide variety of science niches and professions. Each week we focus on a new branch of science and give a brief glance into the field. The goal is for students to find at least one new field that sparks their interest.

Sculpture Club - Sculpture Club gives students the opportunity to explore creativity and hands-on learning through building and design. Students create their own sculptures using a variety of materials such as clay, LEGO bricks, play dough, and other craft supplies. Through this process, students develop fine motor skills, problem-solving abilities, and creativity while expressing their ideas in a fun and supportive environment.

Pokemon Club - Pokémon Club allows students to engage with their interest in Pokémon through a variety of creative and collaborative activities. Students participate in group games, design and create their own Pokémon, and explore challenges inspired by the Pokémon world. The club encourages teamwork, imagination, strategic thinking, and positive social interaction.
