Project Learn

Tues-Fri
4:45-5:20

Project Learn emphasizes high-yield learning activities while providing dedicated time for youth to complete homework or unfinished class assignments.

STEM Labs

Tues & Thurs
3:30-4 (K-2) 4:05-4:35 (3-5)

EiE (Engineering is Elementary) is a hands-on STEM curriculum developed by [Boston's Museum of Science](#). It teaches engineering and science concepts to elementary and middle school students by connecting real-world problem solving with literacy, social studies, and different fields of engineering

Tues-Thurs

Throughout this school year, we are offering diverse enrichment programs. While some are hourly sessions that students can choose to join, others consist of 30-minute activities designed for all youth to participate in together.

Social Emotional Learning (Prevention & Behavior)

Wed 4:55-5:25 (K-5)

SMART Moves (Skills Mastery and Resilience Training) is an evidence-based prevention and education program created by the [Boys & Girls Clubs of America](#). In a Social-Emotional Learning (SEL) context, it helps youth ages 6 to 15 build self-control, emotional awareness, and decision-making skills to resist peer pressure, substance use, and risky behaviors.

August Club & Activity Details

Message to Parents:

Welcome back, parents! We are thrilled to return with a calendar full of engaging activities for your amazing children. Our primary objective this year is to offer enriching experiences that are both educational and entertaining, while also aligning our Club objectives with school-wide goals. Our weekly programming includes several exciting highlights:

- Wednesday Club Rotations: Each Wednesday, students can choose between an hour-long Art Club or Science Club session. We will also rotate (K-2) & (3-5) Positive Action Resources to help youth improve skills they need to understand themselves, manage their emotions, make responsible choices, and build healthy relationships with others.
- Tuesday/Thursday Essentials: Every Tuesday and Thursday, all youth will participate in 30-minute STEM and Enrichment modules.
- Friday Social-Emotional Learning: On Fridays, we will facilitate skill-building activities that mirror the monthly curriculum taught in school.
- Fun Fridays: We are launching a new tradition of relaxed, enjoyable activities that every student will love.

We are eager to start this journey and look forward to welcoming both our returning students and the new faces joining us this year!

Project Learn - The primary focus of Project Learn is to support our youth in completing their homework, engaging in High Yield Learning Activities (HYLA's), and participating in reading and math programs. Our goal is to reduce missing assignments by collaborating with teachers and ensuring that their students complete their daily tasks during our program, allowing for more quality family time at home. For students without homework, we offer a variety of HYLA's, along with different reading and math programs to further enhance their overall knowledge and skills in these important subjects. This runs Tuesday through Friday for 45 minutes!

STEM Labs - This is a program that is run by an Americorps specialist that works at the afterschool site. It consists of YES lessons (Youth Engineering Solutions) that promote hands-on learning of Science, Technology, Engineering, and Math. These lessons are designed to spark curiosity and creativity in the youth. The program offers interactive projects, team challenges, and real-world problem-solving activities that encourage critical thinking and innovation. Our Americorps specialist works hard to offer an environment that fosters a love for learning, encourages collaboration, and builds confidence in the youth, preparing them for a future where STEM skills are more valuable than ever. This is run Tuesdays and Thursdays for 30 minutes.
