BOYS & GIRLS CLUBS
OF UTAH COUNTY

The mission of the Boys & Girls Clubs of Utah County is to inspire and enable all young people, especially those who need us most, to realize their full potential as productive and responsible citizens and leaders.

Happy
Birthday

9/17 Annabelle

UPCOMING EVENTS

9/3 Subsidy Night
9/17 School hearing test
9/10 Fire Drill

CLUB CLOSED

9/7 Labor Day
Every Friday

Get To Know Your Youth Development Professional!

Hi everyone!!
My name is Miss Allie Fisher!! This is my first year teaching the Boys and Girls Club program at Franklin Elementary! You probably want to get to know me right?

Well first off I love to draw, bake, and dance whenever I get the chance. I also love to go hiking and swimming and do anything outdoors! Right now I am attending BYU! Go Cougs! I love the colors blue and pink so you will probably see me wearing them a lot. I also love working with kids! I am the oldest in my family and I have one niece and one nephew so far!! Anyways, I am so excited to get to know all of you this year!!

PARENT RESOURCES

[Parent Handbook](#)
[Membership Handbook](#)

Project Learn

Mondays and Wednesdays 3-6 Tuesdays and Thursdays K-2

Project Learn is a dedicated time where students strengthen their reading, writing, and math skills through fun, interactive activities, HYLAs (High Yield Learning Activities), and academic challenges. For more information about this and other activities, please visit our Clubs & Activity pages.

STEM Labs

Mondays and Wednesdays K-2 Tuesdays and Thursdays 3-6

This month, students will be doing EiE (Engineering is Everywhere) and are working on "Best of Bugs: Designing Hand Pollinators", where they'll continue exploring hands-on design and problem-solving. For more information about this and other activities, please visit our Clubs & Activity pages.

Enrichment

Mondays and Wednesdays 3-6 Tuesdays and Thursdays K-2

This month, Enrichment will focus on **creative art activities** while incorporating movement through fun, interactive games and challenges. Students will have opportunities to express their creativity, stay active, and build teamwork skills. For more information about this and other activities, please visit our Clubs & Activity pages.

Social Emotional Learning

Mondays and Wednesdays K-2 Tuesdays and Thursdays 3-6

This month, Enrichment will focus on creative art activities while incorporating movement through fun, interactive games and challenges. Students will have opportunities to express their creativity, stay active, and build teamwork skills. For more information about this and other activities, please visit our Clubs & Activity pages.

September Club & Activity Details

Message to Parents:

We can't believe we are already heading into our second month of the school year! The first month has been filled with so many fun moments, new friendships, and opportunities for our students to learn and grow. It has been amazing getting to know your children, seeing their personalities shine, and watching them become more comfortable and confident in our program.

As we continue into this next month, we are excited to keep building on the relationships and routines we have started. Our clubs and activities are designed with goals in mind to help students grow in creativity, teamwork, problem-solving, communication, confidence, and positive decision-making. Through activities like Robotics, STEM, Sports Club, Enrichment, SEL, and Project Learn, students will continue exploring new interests while building skills they can use both inside and outside of the Club.

Thank you for trusting us with your children each day. We truly appreciate your support and partnership as we continue creating a safe, welcoming, and fun environment where every student feels like they belong.

We can't wait to see what this next month brings!

Snack and Check in/Out - Each day, students are served a **Super Snack** during the first 15 minutes after school. Our Super Snack typically includes five components: a **grain, dairy, protein, fruit, and vegetable** to help students refuel after their school day.

Later in the afternoon, before dismissal, students will also receive a **PM Snack**. This is a lighter snack that typically includes **two components**, such as a **grain and a fruit** or a **grain and a vegetable**, to help keep students energized until they get home.

If your child attends the program for snack, please note that **all snacks must be eaten on-site**. After receiving their snack, students will sit at their assigned table to eat. We also have a **Share Bin** where unopened, unwanted snack items are placed. If your child is still hungry after finishing their snack, they are welcome to choose an item from the Share Bin.

Before receiving their Super Snack, students will be **checked into the program**. Once checked in, they will place their backpacks in their designated grade-level bins before lining up to receive their snack.

For your child's safety, **all students must be checked out before leaving the program**. Students may only leave with an approved adult listed on their registration form or with someone you have added to their authorized pick-up list by contacting me.

If your child is an **approved walker**, they may leave independently only if we have received prior authorization from a parent or guardian. Students enrolled in the full afterschool program may be approved to walk home before our regular dismissal time of **5:30 PM**. Students who are enrolled **only in a Specialty Club** may be approved to walk home at **4:45 PM**, following the conclusion of their club.

Circle Up -Circle Up is held **every day for the first 15 minutes after snack** and is the first activity we do as a program. This is a time for students and staff to come together, connect with one another, review the schedule for the day, and prepare for a successful afternoon at the Club.

This month, Circle Up will focus on **leadership, communication, and teamwork**. Students will participate in fun icebreakers, team-building challenges, and group discussions that help them practice listening, encouraging others, and working together. Activities like **Human Knot, Silent Line-Up, Telephone, Team Challenges, and Desert Island** will help students strengthen their communication skills while building friendships with their peers.

We will also continue reviewing our **Big 5 Expectations** and recognizing students who show kindness, responsibility, respect, and leadership throughout the program. Circle Up helps create a positive Club environment where every student feels welcomed, valued, and ready for the day ahead!

Enrichment - Our Enrichment Activity takes place **Mondays and Wednesdays for grades K-2 and Tuesdays and Thursdays for grades 3-6**, from **4:00-4:45 PM**. During this time, students are grouped by age (K-2 and 3-6) to ensure activities are developmentally appropriate and engaging for all participants.

This month, Enrichment will focus on a **creative arts and movement theme**, where students will explore their creativity through hands-on art activities while also participating in fun physical activities. Students will have opportunities to express themselves, try new things, and build skills such as teamwork, communication, confidence, and problem-solving.

Through a mix of creative projects and active games, students will be able to explore different ways to learn, create, and have fun together!

SEL (Social Emotional Learning) - While one group participates in Enrichment, the other group will engage in our **SEL (Social Emotional Learning)** activities. SEL takes place **Mondays and Wednesdays for grades K-2 and Tuesdays and Thursdays for grades 3-6**, from **4:00-4:45 PM**.

This month, we will continue building our students' social-emotional skills through lessons focused on **understanding ourselves, our choices, and how we positively impact those around us**. Students will explore topics such as **How You Want to Be, The Difference Between Being Alright and Not Being Alright, Choosing to Do Positive Action in a Big Way, Our Family: The Most Important People, Taking the Message Home, How to Make a Bad Thing Better, and Giving Ourselves a Break**.

Each lesson will be adapted to be age-appropriate, allowing students to better understand their emotions, build confidence, practice positive decision-making, and strengthen their relationships with others. These skills help students continue to grow both inside and outside of the Club.

Net Positive - Net Positive is a course taught **Once a month**, where our Net Positive specialist comes in to lead lessons with our students. These sessions typically take place during the **Last Wednesday** of each Month and will temporarily replace STEM activities while they are being held.

Net Positive focuses on **online safety and digital responsibility**. Students learn how to stay safe while using technology, how to protect themselves online, and what to do if they encounter situations such as cyberbullying or unknown individuals trying to contact them.

www.facebook.com/bgcutah

www.instagram.com/bgcutah

Utah State Board of Education

As technology continues to grow in our everyday lives, these lessons help students build the tools and confidence they need to make safe, responsible, and informed choices online.

STEM - STEM will take place from **4:50–5:20 PM**, with **3-6 on Mondays and Wednesdays** and **grades K-2 on Tuesdays and Thursdays**. This is part of our **EiE (Engineering is Everywhere)** series, which will continue throughout the program.

This month, we will be wrapping up our **EiE: Best of Bugs: Designing Hand Pollinators** unit! Students have had the opportunity to explore the engineering design process by creating, testing, and improving their designs while building creativity, problem-solving skills, and thinking like engineers.

We are excited to see our students continue building, experimenting, and discovering new ways to think like engineers!

Project Learn - Project Learn takes place from **4:50–5:20 PM**, with **grades K-2 on Mondays and Wednesdays** and **3-6 on Tuesdays and Thursdays**.

Project Learn continues to be a time where students strengthen their **reading, writing, and math skills** through fun and interactive learning activities. This month, students will participate in activities such as **Book Tastings** and **Story Scrambles** to build reading skills, along with creative writing activities like **Would You Rather Writing Challenges, Story Starters, and Postcards from the Future** to encourage imagination and storytelling.

For math, students will take on challenges like **Math Around the World** and **Minute Math Challenges** to practice problem-solving, build confidence, and strengthen their math skills in a fun and engaging way.

Through HYLA's (High Yield Learning Activities), students will continue learning, creating, and growing while making academics enjoyable!

Specialty Clubs - Our Specialty Clubs take place during regular program hours from **3:20–4:45 PM**. Students will arrive and have snack as usual, and then transition into their assigned club. At 4:45 PM, students who are enrolled only in Specialty Clubs will be picked up or may walk home if they are approved walkers. Students enrolled in the full afterschool program will join us after clubs end.

Below is a list of our Specialty Clubs:

Hope of America: Hope of America is a large, patriotic music event that brings together thousands of 5th graders from across the state at the BYU Marriott Center. Students will sing historic songs, honor first responders, and participate in a powerful performance that includes forming a giant living American flag using colored shirts.

This event takes place in May, but we have partnered with 5th grade classrooms to begin preparation early. This allows students time to practice and prepare while still continuing their regular school-day curriculum.

Robotics: Robotics Club is open to all ages and is designed to support both beginners and students with prior experience. We offer **K-2 on Tuesdays and Thursdays** and **3-6 on Mondays and Wednesdays**.

www.facebook.com/bgcutah

www.instagram.com/bgcutah

Utah State Board of Education

Due to high interest from students—including many younger siblings—we have created a **Junior Robotics option** to introduce younger students to the basics of coding and engineering. This helps prepare them for more advanced robotics as they get older.

This week, students will focus on foundational robotics skills appropriate to their age group, and next week they will begin hands-on work with our robotics kits.

Sports Club (Flag Football): Sports Club is offered for **K-2 on Mondays and Wednesdays** and **3-6 on Tuesdays and Thursdays**. This term, we will focus on **Flag Football**, where students will learn the basics of the game in a fun and supportive environment.

No prior experience is needed—students will be taught everything they need to know! Our main focus is building **sportsmanship, teamwork, discipline, and collaboration**.

As the term continues, we will also introduce other sports such as basketball, soccer, and more to keep students active and engaged.

Little Lifesavers(K-2): Give your little ones the skills to stay safe, healthy, and prepared! Little Lifesavers is a fun, hands-on club designed for Kindergarten through Second Grade students. Children will learn age-appropriate lessons about safety, nutrition, and taking care of their minds and bodies.

Through engaging activities, students will learn basic CPR, practice what to say when calling 911, and develop important skills they can use in an emergency. It's a fun and meaningful way to build confidence, encourage healthy habits, and introduce lifesaving skills from a young age!
