Get To Know

Hello! My name is Dania Eddington. I am from San Diego, CA. I am studying elementary education at Utah Valley University. I am so excited to be working as a STEM specialist this year! We will be engineering some exciting things and learning more about how that relates to other areas of STEM and our everyday lives! I'm excited to work with you all, and please don't hesitate to reach out with any questions or concerns!

PARENT RESOURCES

[Parent Handbook](#)
[Membership Handbook](#)

Project Learn

Monday/Wednesday 4:50PM-5:20PM

A dedicated time for students to strengthen their reading and math skills while exploring engaging, hands-on activities in science, social studies, and other academic areas. Learning is fun, interactive, and designed to help every student succeed!

STEM Labs

Monday/Wednesday 4:00PM-4:30PM
(K-2)

Tuesday/Thursday 4:00PM-4:30PM
(3-6)

Students engage in hands-on science, technology, engineering, and math activities that promote creativity, problem-solving, and critical thinking. A YES curriculum is used to deliver fun, interactive, and structured lessons that keep students actively learning and engaged.

Enrichment

We are currently in the process of hiring specialty teachers for our clubs. As soon as we have the clubs up and running, we will let all families know. We apologize for any inconvenience and truly appreciate your patience and understanding as we work to get everything in place. Thank you for your continued patience and support!

Social Emotional Learning (Prevention & Behavior)

Tuesday/Thursday 4:50PM-5:20PM

Students develop important life skills such as managing emotions, building healthy relationships, showing empathy, and making responsible decisions through guided activities, discussions, and group experiences.

Windsor Elementary After School Program 2026 - 2027

September Club & Activity Details

Message to Parents:

Thank you for a great start to the school year! We have enjoyed getting to know your children and watching them participate in our afterschool clubs and activities since August. We are excited for the months ahead and look forward to providing fun, engaging, and enriching experiences for all students. Thank you for your continued support!

STEM: Students participate in hands-on science, technology, engineering, and math activities that encourage creativity, critical thinking, and problem-solving through fun and engaging lessons. Our AmeriCorps member leads STEM activities using the YES curriculum to provide interactive and engaging learning experiences. **This year, in recognition of the 25th Anniversary of 9/11, we will observe a commemorative day of reflection and service. Our AmeriCorps Specialist will lead an age-appropriate lesson about the significance of September 11 and the importance of community service. As part of this activity, students will complete a service project by creating thank-you cards, letters, or drawings for local first responders (police officers and firefighters), members of the National Guard, and veteran organizations to express gratitude for their service and dedication.**

Project Learn: During Project Learn, students receive extra support in reading and math while also participating in engaging lessons and activities focused on science and social studies to help strengthen academic skills and encourage a love of learning.

Positive Action (SEL): Students participate in activities and discussions that build social-emotional skills such as self-confidence, empathy, responsible decision-making, and positive relationships. The Positive Action curriculum helps students develop character, leadership, and healthy habits for success in school and beyond.

Net Positive Program – Internet Safety: The program, *Net Positive*, is designed to teach students about internet safety and responsible digital behavior. The focus of the program is to help students develop the knowledge and skills needed to navigate online spaces safely, respectfully, and confidently. As part of this program, a specialist will come in twice a month to deliver structured lessons on internet safety. These sessions will cover topics such as safe online communication, protecting personal information, understanding digital footprints, cyberbullying awareness, and responsible use of technology and social media. The goal of Net Positive is to ensure students understand both the opportunities and risks of being online, while building positive habits that support their long-term safety and well-being in digital environments.

Art Without Borders: is a creative celebration of Hispanic heritage and culture through hands-on art projects. Students will explore the colors, traditions, stories, artists, and creativity of Hispanic and Latino communities from around the world. Through painting, sculpture, crafts, and other activities, we'll learn how art can connect people and cultures without borders.

Specialty Clubs

We are currently in the process of hiring specialty teachers for our clubs. As soon as we have the clubs up and running, we will let all families know. We apologize for any inconvenience and truly appreciate your patience and understanding as we work to get everything in place.

Thank you for your continued patience and support!
