November Club & Activity Details

Message to Parents:

Hello! We love working with your kids, and we will continue to push forward and grow. We are currently working on hiring more staff so we can create some more enrichment opportunities for all members! Below describes different activities the members participate in throughout the month.

Project Learn/Power Hour - Power Hour offers a structured window for students to prioritize academic obligations. Our facilitators assist members in completing assignments and managing daily tasks to minimize missing work. For those without homework, we provide enriching alternatives including math and literacy centers, alongside High Yield Learning Activities. This program runs every day.

STEM - Americorp - STEM (Science, Technology, Engineering, and Math) is a hands-on way for students to explore the world around them. Through interactive labs, children develop critical thinking and problem-solving skills by building, designing, and experimenting. It's a fun, engaging way to spark curiosity and build a strong foundation for future learning.

Positive Action - On Tuesdays and Thursdays, we utilize the evidence-based Positive Action curriculum. This program is woven into our Club culture to promote a supportive environment where youth are empowered to reach their full potential. By focusing on real-life applications, members learn to cultivate a positive self-concept and excel in their daily interactions.

SMART Moves - Every Monday throughout this ten-week cycle, members participate in SMART Moves. This suite of targeted prevention programming equips young people with the critical thinking skills and healthy attitudes necessary to navigate complex decisions and avoid risky behaviors.

Fire Drill- To maintain a safe environment, we will conduct a scheduled fire drill. This practice ensures that all members and staff are thoroughly prepared to follow established safety protocols and emergency evacuation procedures.
