Get To Know

Hello! My name is Lizbeth Godínez, and I recently moved to Utah at the end of August. I have been working with the Boys & Girls Club for the past five years in California, and I'm excited to continue being part of this wonderful organization. In my free time, I enjoy hiking, shopping, and spending quality time with my family.
I'm looking forward to an exciting year with the Boys & Girls Club, building relationships with staff and students, and continuing to learn and grow together!

PARENT RESOURCES

Parent Handbook
Membership Handbook

Project Learn

Monday/Wednesday 4:50PM-5:20PM

A dedicated time for students to strengthen their reading and math skills while exploring engaging, hands-on activities in science, social studies, and other academic areas. Learning is fun, interactive, and designed to help every student succeed!

STEM Labs

Monday/Wednesday 4:00PM-4:30PM (K-2)
Tuesday/Thursday 400PM-4:30PM (3-6)

Students engage in hands-on science, technology, engineering, and math activities that promote creativity, problem-solving, and critical thinking. A YES curriculum is used to deliver fun, interactive, and structured lessons that keep students actively learning and engaged.

Enrichment

Soccer Club:
Tuesdays & Thursday 3:30pm-4:40pm
Creative Club:
Monday & Wednesday 3rd-6th
Tuesday & Thursday K-2
3:55pm-4:30pm

Social Emotional Learning (Prevention & Behavior)

Tuesday/Thursday 4:50PM-5:20PM

Students develop important life skills such as managing emotions, building healthy relationships, showing empathy, and making responsible decisions through guided activities, discussions, and group experiences.

BOYS & GIRLS CLUBS
OF UTAH COUNTY

November Club & Activity Details

Message to Parents:

As we enter November, we want to thank you for your continued support. We have enjoyed watching your students try new things, participate in new activities, and grow through their club experiences. We hope you have been hearing exciting stories from your children as they come home and share about their day and all the fun things they are learning and doing with us. We are proud of their enthusiasm and look forward to more fun and learning in the months ahead.

STEM: Students participate in hands-on science, technology, engineering, and math activities that encourage creativity, critical thinking, and problem-solving through fun and engaging lessons. Our AmeriCorps member leads STEM activities using the YES curriculum to provide interactive and engaging learning experiences.

Project Learn: During Project Learn, students receive extra support in reading and math while also participating in engaging lessons and activities focused on science and social studies to help strengthen academic skills and encourage a love of learning.

Positive Action (SEL): Students participate in activities and discussions that build social-emotional skills such as self-confidence, empathy, responsible decision-making, and positive relationships. The Positive Action curriculum helps students develop character, leadership, and healthy habits for success in school and beyond.

Enrichment Club: is a fun and hands-on after-school program where students can explore their creativity through arts and crafts. Students will create different projects using a variety of materials while developing their imagination, artistic skills, and confidence. This club is a welcoming space for students to have fun, express themselves, and enjoy being creative!

Net Positive Program – Internet Safety: The program, *Net Positive*, is designed to teach students about internet safety and responsible digital behavior. The focus of the program is to help students develop the knowledge and skills needed to navigate online spaces safely, respectfully, and confidently. As part of this program, a specialist will come in twice a month to deliver structured lessons on internet safety. These sessions will cover topics such as safe online communication, protecting personal information, understanding digital footprints, cyberbullying awareness, and responsible use of technology and social media. The goal of Net Positive is to ensure students understand both the opportunities and risks of being online, while building positive habits that support their long-term safety and well-being in digital environments.

Specialty Clubs

Soccer Club: is a fun and active after-school program where students can learn and improve their soccer skills while building teamwork, communication, and confidence. Students will participate in skill-building activities, practice fundamental techniques, play games, and develop a love for the sport in a positive and encouraging environment. No previous soccer experience is required—everyone is welcome!
