PARENT RESOURCES

Parent Handbook
Membership Handbook

Power Hour

Power Hour is a period of time during our clubs where we provide students with Homework Help and an opportunity to increase literacy skills.

STEM

Tuesday, Thursday 4:30-5:15 pm

Students will have the opportunity to learn from a STEM Specialist every Tuesday and Thursday to increase their knowledge on the different STEM-related fields.

Enrichment

Tuesday - Friday

Students are given the opportunity to explore and learn different skills and a variety of different activities through specialty clubs.These clubs will change each term to provide a full range of artistic, creative, physical, and educational courses.

Positive Action

Tuesday & Thursday 3:00-3:30 pm

Positive Action is used to teach students social emotional learning skills. They will learn communication skills and social skills that they can use their entire lives. We strive to help youth be their best in all situations.

Net + and Digital Citizenship

Wednesday 3:00-3:30 pm

Net + and our Digital Citizenship certification give teens the opportunity to learn the positive benefits of the internet and how to appropriately use it. This provides a necessary foundation as they grow up in a digital world.

October Club & Activity Details

Welcome to Month 3 of our After-School Club Program! We have had an amazing start to the year and are excited to continue providing students with opportunities to learn new skills, build friendships, and have fun after school. This month brings a new selection of engaging clubs and activities designed to help students explore their interests, develop confidence, and stay connected with their peers. We look forward to another great month of learning, creativity, and adventure!

Pokémon Club - Pokémon club is a fun, social environment where students can build strategic thinking and math skills through the Pokémon Trading Card Game. Designed for middle schoolers of all skill levels, our club offers a safe space for members to play casual matches and make new friends.

Sculpting Club - Sculpting Club encourages students to express their creativity by transforming a variety of materials into three-dimensional works of art. Participants will learn different sculpting techniques while experimenting with clay, recycled materials, and other mediums. The club promotes patience, problem-solving, and artistic confidence through hands-on creation.

Rollerblading Club - Rollerblading Club is a fun and active way for students to build confidence, coordination, and balance while learning new skating skills. Participants will practice safety, teamwork, and perseverance through games, drills, and group activities. Whether they are beginners or experienced skaters, everyone will have the chance to improve and have fun.

Dungeons and Dragons Club - D&D Club invites students into exciting fantasy adventures where they work together to solve problems, overcome challenges, and tell imaginative stories. Through collaborative gameplay, participants develop creativity, communication, critical thinking, and teamwork skills. No previous experience is needed—just a willingness to imagine and have fun.

Art Around the World Club - Art Around the World introduces students to artistic styles, techniques, and traditions from cultures across the globe. Each week, participants will create projects inspired by artists and art forms from different countries while learning about their cultural significance. The club encourages creativity, appreciation for diversity, and self-expression through hands-on art experiences.

Sports Club - Sports Club gives students the opportunity to stay active while learning teamwork, sportsmanship, and healthy competition through a variety of games and activities. Participants will play different sports and recreational games that build coordination, communication, and leadership skills. The focus is on having fun, developing confidence, and encouraging lifelong healthy habits.
