PARENT RESOURCES

Parent Handbook
Membership Handbook

Project Learn

Power Hour helps students complete homework, strengthen reading and math skills, and participate in engaging learning activities. Our goal is to support academic success while reducing missing assignments and giving families more quality time together at home.

STEM Labs

Students explore science, technology, engineering, and math through hands-on activities that build creativity, critical thinking, and problem-solving skills. Using the YES curriculum, our AmeriCorps member leads fun and engaging STEM lessons.

Social Emotional Learning (Prevention & Behavior)

Positive Action is an evidence-based program that helps create a positive and encouraging environment for students. Through engaging activities, students learn real-life skills that build confidence and encourage them to be their best.

Enrichment

Students will explore a variety of exciting activities, including sports, music, art, STEM, and more. From getting creative to trying new skills and working together, there's something for everyone to enjoy. It's the perfect place to learn, discover new interests, and have fun with friends!

After School Program
2025-2026

November Club & Activity Details

Positive Action- The Positive Action curriculum is an evidence based program that is integrated in afterschool activities to build a positive environment throughout the program -- an environment that encourages students to do their best and be their best. Positive Action teaches real-life concepts that help students feel good about themselves.

Power Hour - The primary focus of Power Hour is to support our youth in completing their homework, engaging in High Yield Learning Activities (HYLAs), and participating in our reading and math programs. Our goal is to reduce missing assignments by collaborating with school-day teachers and ensuring that students complete their daily tasks during our program, allowing for more quality family time at home. For students without homework, we offer a variety of HYLAs, along with our reading and math programs, to further enhance their overall knowledge and skills in these important subjects.

STEM - Students participate in hands-on science, technology, engineering, and math activities that encourage creativity, critical thinking, and problem-solving through fun and engaging lessons. Our AmeriCorps member leads STEM activities using the YES curriculum to provide interactive and engaging learning experiences.

Science Cub - Thanksgiving Point - Get ready to explore, experiment, and discover! Each week, we'll dive into a new area of science with exciting hands-on activities. Students might explore DNA & genetics, chemical reactions, robotics, space, dinosaurs, forensics, earthquakes, and more!

Technology Club - Thanksgiving Point - Love technology? Come create, build, and explore the world of tech! Each week features a new topic, including robotics, coding, animation, video games, 3D printing, app development, AI, virtual reality, circuits, and more

Enrichment - Students will explore a variety of exciting activities, including sports, music, art, STEM, and more. From getting creative to trying new skills and working together, there's something for everyone to enjoy. It's the perfect place to learn, discover new interests, and have fun with friends!
