Fischer - 29th

UPCOMING EVENTS

11/24 - Thanksgiving Party

CLUB CLOSED

No Program on Mondays

11/25-11/27 NO CLUB-THANKSGIVING BREAK

Get To Know

Hi! My name is Alexa Child, students are welcome to call me Alexa or Miss Alexa! I am very excited to be joining the Boys and Girls Club this year and can't wait to meet all of the students. I am from Springville, Utah and am currently living in Provo while I go to school at Utah Valley University! I am studying to be an elementary school teacher and I love working with kids and seeing them grow. I love to spend time outside doing really anything, but I especially love hiking, golfing, and camping. I also love to be creative and work with my hands. My goal is to help each of the students to feel like they belong and have plenty of space to grow and learn in a way that is fun and engaging! I am so excited to see what the students can accomplish this year!

PARENT RESOURCES

Parent Handbook
Membership Handbook

Project Learn (Power Hour)

Tuesday-Friday (K-5)
4:45pm-5:30pm

Students will have dedicated time to focus on academically enriching activities which may include completing homework assignments, practicing math skills, reading independently or with peers, or engaging in other High Yield Learning Activities (HYLAs) that reinforce classroom learning.

STEM Labs

3:30pm-4:30pm (K-2) Tuesday & Thursday
3:30pm-4:30pm (3-5) Wednesday & Friday

Activities involving science, technology, engineering, mathematics, and related topics. Kids will learn a variety of STEM related skills and participate in many hands-on activities. This term's focus is Engineering! We will have "Engineering is Elementary" on Tuesday & Wednesday and "Mission:Engineering" on Thursday and Friday.

Enrichment

3:30pm-4:30pm (3-5) Tuesday & Thursday
3:30pm-4:30pm (K-2) Wednesday & Friday

Clubs are provided Tuesday-Friday that are designed to introduce new activities, new passions, and new ideas to the children. This month's specialty clubs are the STEM Labs mentioned above and Mini Olympics Club.

BOYS & GIRLS CLUBS
OF UTAH COUNTY

November Club & Activity Details

Message to Parents:

We are officially off to a fantastic start with our afterschool program at Park Elementary! After our first six days of club, the kids are having an absolute blast, building friendships, and diving right into our activities. Thanks to a one-year grant covering our program costs, we're thrilled to continue offering this high-quality, completely FREE programming to Park families all school year long. Club runs Tuesday through Friday from 3:00 pm to 5:30 pm. This month, students will keep exploring the STEM Engineering Club—designing, building, and problem-solving through hands-on challenges—and staying active in Mini Olympics Club, where they build sportsmanship, physical skills, and teamwork. Every day also includes Power Hour for dedicated homework and reading support. We're also excited to welcome Alexa Child as our newest Youth Development Professional! To help us offer even more specialty enrichment classes, we are currently hiring for one more staff member. Thank you for sharing your kids with us as we continue to grow, learn, and have fun together!

Power Hour - The primary focus of Power Hour is to support our youth in completing their homework, engaging in High Yield Learning Activities (HYLAs), and participating in our reading and math programs. Our goal is to reduce missing assignments by collaborating with school-day teachers and ensuring that students complete their daily tasks during our program, allowing for more quality family time at home. For students without homework, we offer a variety of HYLAs, along with our reading and math programs, to further enhance their overall knowledge and skills in these important subjects. This is completed Tuesday-Friday for 30 minutes!

Specialty Clubs:

STEM Labs - **STEM Engineering Club** is a hands-on afterschool program for children ages 5-12, where learning happens through exploring, creating, and problem-solving! In this club, students will dive into the world of engineering through exciting, hands-on STEM activities. Each week, youth will practice creativity, critical thinking, teamwork, and problem-solving as they explore how engineers design, build, test, and improve their ideas. Students will participate in a variety of activities focused on science, technology, engineering, and mathematics while discovering how STEM skills are used to solve real-world challenges. Tuesdays and Wednesdays will feature our **Engineering is Elementary** curricula, while Thursdays and Fridays will feature **Mission: Engineering**, giving students new challenges and opportunities to put their engineering skills to the test!

Mini Olympics Club is an active and exciting afterschool program for children ages 5-12, where learning happens through movement, teamwork, and friendly competition! In this club, students will explore a variety of Olympic-inspired sports and challenges while developing physical skills, coordination, and confidence. Each week, youth will participate in fun activities that encourage teamwork, perseverance, sportsmanship, and trying their best. From relay races and obstacle courses to throwing, jumping, and team challenges, students will have the opportunity to discover new activities and build skills while working toward becoming their own Mini Olympic champions! Students in grades K-3 will join the club on Tuesdays and Thursdays, while those in grades 4-6 will participate on Wednesdays and Fridays.

More Specialty Clubs Coming Soon!

We're excited to start with two specialty clubs—STEM Engineering and Olympic Sports! As we continue hiring talented specialty teachers, we plan to add even more fun and engaging clubs throughout the year. Our specialty clubs are designed to give kids the opportunity to learn a specific skill, build their confidence, and have something they can showcase at the end of the club!

Do you have a skill or passion you'd love to teach kids? We're always looking for people who are interested in teaching a specialty class! Whether it's sports, art, music, cooking, science, technology, or another unique skill, reach out to us to learn more about becoming a specialty teacher and sharing your talents with our students.
