Friday November 13th- Staff Training

Wednesday-Friday November 25th-27th- Thanksgiving Break

Get To Know

My Name is Joanna, and I'm a proud mom to a little boy with another one on the way! Being a mom has taught me so much about patience, compassion, and how important it is to make children feel loved, safe, and supported. I love working with kids, helping them learn new things, and creating a fun, positive environment where they can grow and be themselves. I'm excited for this new opportunity and look forward to getting to know each child and making a positive impact in their lives!

PARENT RESOURCES

Parent Handbook
Membership Handbook

Project Learn

Tues-Fri
3:10-3:40

Project Learn emphasizes high-yield learning activities while providing dedicated time for youth to complete homework or unfinished class assignments. To help students excel, we will focus on a specific monthly academic goal designated by

STEM Labs

Tues & Thurs
4:00 to 5:00

EiE (Engineering is Elementary) is a hands-on STEM curriculum developed by Boston's Museum of Science. It teaches engineering and science concepts to elementary and middle school students by connecting real-world problem solving with literacy, social studies, and different fields of engineering

Enrichment

Tues-Thurs

Throughout this school year, we are offering diverse enrichment programs. While some are hourly sessions that students can choose to join, others consist of 30-minute activities designed for all youth to participate in together.

Social Emotional Learning (Prevention & Behavior)

Tues-Friday 3:10-3:30
(K-5)

Positive Action Social and Emotional Learning (SEL) is a program that helps students build the skills they need to understand themselves, manage their emotions, make responsible choices, and build healthy relationships with others.

BOYS & GIRLS CLUBS
OF CARBON COUNTY

November Club & Activity Details

Message to Parents:

Welcome November! We are thankful for another month with a calendar full of engaging activities for your amazing children. Our primary objective this year is to offer enriching experiences that are both educational and entertaining, while also aligning our Club objectives with school-wide goals.

Power Hour - The primary focus of Power Hour is to support our youth in completing their homework, engaging in High Yield Learning Activities (HYLA's), and participating in reading and math programs. Our goal is to reduce missing assignments by collaborating with teachers and ensuring that their students complete their daily tasks during our program, allowing for more quality family time at home. For students without homework, we offer a variety of HYLA's, along with different reading and math programs to further enhance their overall knowledge and skills in these important subjects. This will run Tuesday through Friday for 30 minutes.

STEM - **STEM Labs** - This is a program that is run by an Americorps specialist that works at the afterschool site. It consists of IEI & YES lessons that promote hands-on learning of Science, Technology, Engineering, and Math. These lessons are designed to spark curiosity and creativity in the youth. The program offers interactive projects, team challenges, and real-world problem-solving activities that encourage critical thinking and innovation. Our Americorps specialist works hard to offer an environment that fosters a love for learning, encourages collaboration, and builds confidence in the youth, preparing them for a future where STEM skills are more valuable than ever. This is run Tuesdays and Thursdays for 30 minutes.

SMART Moves - (Skills Mastery and Resilience Training) is an evidence-based prevention and education program created by the Boys & Girls Clubs of America. In a Social-Emotional Learning (SEL) context, it helps youth ages 6 to 15 build self-control, emotional awareness, and decision-making skills to resist peer pressure, substance use, and risky behaviors.

Photography Club- Introduces young learners to the magic of capturing the world through a lens.
Through engaging activities like photo scavenger hunts and outdoor nature walks, students explore their surroundings while transforming everyday environments into personal artistic canvases.
Core Skills Being Built: Composition & Creative Vision, Basic Technical Awareness, Digital Literacy & Introduction to Editing, and Social-Emotional & Communication Skills. Photography club will be on Tuesdays.

The Drama/Theater Club- Focuses on developing students' skills as performers through structured lessons and engaging activities.

Blanket Making- The tie blankets service project involves students working together to tie blankets as a hands-on community service activity. Through this project, youth contribute to helping others while building teamwork, responsibility, and a sense of community care

Creative Club - A vibrant and imaginative space where young minds bring their biggest ideas to life! This club is an open-ended studio environment designed to spark curiosity, self-expression, and innovation. Through a mix of hands-on arts and crafts, collaborative building projects, storytelling, and sensory exploration, members will dive into different creative mediums each week. Whether they are painting a masterpiece, engineering a cardboard castle, or inventing a new game, students will discover that there are no mistakes in creativity, only new discoveries! Core Skills Being Built: Artistic & Technical Skills, Cognitive & Problem-Solving Skills, Social-Emotional Skills, Communication & Presentation.
